Summary

Junior Flutter Developer with hands-on experience building scalable, cross-platform mobile applications using Flutter, Dart, and Firebase. Skilled in Cubit/Bloc state management, REST API integration, and Clean Architecture, with practical experience delivering real-world projects, including an AI-powered vehicle diagnostics application with machine learning and chatbot integration. Trained through DEPI, ITI, and NTI programs with a strong foundation in Git-based collaboration, problem-solving, and clean coding practices. Collaborative team player with genuine enthusiasm for learning new tools and continuously improving app performance and code quality.

Education & Training

Bachelor's Degree in Computer Science & Information Technology,	2026
<i>Faculty of Computers and Information, Zagazig University</i>	Zagazig, Egypt
Grade: Very Good GPA: 3.41 / 4.00	

Digital Egypt Pioneers Initiative (DEPI) Jun 2025 - Dec 2025	06/2025 – 12/2025
- Selected for the nationally recognized Digital Egypt Pioneers initiative by the Ministry of Communications and Information Technology (MCIT). - Completed intensive training in cross-platform mobile development using Flutter and Dart, covering topics like clean architecture, state management, Firebase integration, and performance optimization. - Also developed key soft skills including teamwork, problem-solving, time management, and communication through interactive workshops and group projects.	
Expected Graduation: 2025	

National Telecommunication Institute (NTI) 2025 Practical Training Program – Mobile Development 	01/2025 – 03/2025
- Completed intensive training in mobile application development, enhancing skills in Flutter and Dart. - Implemented various features, focusing on UI/UX principles and efficient data handling.	
Expected Graduation: 2025	

Intensive Training Program(Focus on Mobile Application Development with Flutter), Information Technology Institute (ITI) 2024	06/2024 – 09/2024
- Mastered foundational and advanced concepts of Flutter development, including state management with Bloc / Cubit. - Built multiple functional applications, integrating REST APIs and local storage solutions like Hive and SharedPreferences.	
Expected Graduation: 2024	

Skills

Mobile Development

Flutter, Dart, Cross-platform Development, Responsive UI, App Performance Optimization

Backend & APIs

Firebase Authentication, Cloud Firestore, Crashlytics, Analytics, REST APIs, Dio, JSON Parsing, Error Handling

Local Storage

Hive, SharedPreferences, Caching

Tools & Version Control

Git, GitHub

Mobile Development

Flutter, Dart, Bloc/State Management

Software Design

CleanArchitecture, Object-Oriented Programming (OOP) Concepts, Data Structures

Programming Languages

Dart, C++

State Management

Bloc, Cubit, Provider, GetX

Architecture & Design

Clean Architecture, Feature-Based Architecture, Dependency Injection, OOP, SOLID Principles, Clean Code

Programming Languages

Dart, C++

Soft Skills

Problem Solving, Team Collaboration, Communication, Agile Teamwork

Backend Integration

Firebase (Authentication, Message Storage), RESTful APIs

Version Control

Git, GitHub

Other

UI/UXDesign Principles

Projects

Drive Mate — Mobile Application (Graduation Project)

2026

AI-powered Flutter application that helps drivers detect engine faults by analyzing engine sounds, combining Firebase, machine learning, and a conversational AI assistant.

- Designed and developed a scalable cross-platform Flutter application using Clean Architecture and Feature-Based Architecture with Dependency Injection.
- Integrated AI-powered engine diagnostics through machine learning services and engine sound recording for real-time fault detection.
- Implemented secure Firebase Authentication and Cloud Firestore synchronization for vehicle and user data management.
- Built Vehicle Management, Maintenance Reminders, Repair Recommendations, and Local Notification features to improve user experience.
- Integrated a Gemini AI chatbot to provide intelligent, real-time guidance on vehicle issues and maintenance.
- Optimized Cubit-based state management and app performance, ensuring a responsive UI with robust error handling.

Technologies: Flutter, Dart, Firebase, Firestore, REST APIs, Cubit, Clean Architecture, SharedPreferences, Local Notifications, Gemini AI, Machine Learning, Git

Drive Mate — Admin Dashboard

2026

Flutter Web admin dashboard for monitoring and managing users, vehicles, maintenance records, and AI diagnosis data for the Driver Mate ecosystem.

- Developed a responsive Flutter Web dashboard enabling administrators to monitor application data in real time.
- Built User Management, Vehicle Management, and Maintenance Monitoring modules with reliable data integrity.

- Displayed AI diagnosis history and Reports & Analytics using real-time Firebase Firestore data.
- Implemented Authentication & Authorization with role-based access control to secure administrative functions.
- Designed reusable dashboard UI components on a scalable Clean Architecture to support future feature expansion.

Technologies: Flutter Web, Dart, Firebase, Firestore, REST APIs, Cubit, Clean Architecture, Responsive UI, Git

Quiz App (DEPI Final Project)

10/2025 – 12/2025

- Built a Flutter quiz application with Firebase Firestore, Authentication, Analytics, and Crashlytics for stability tracking.
- Applied Clean Architecture and performance optimization practices learned throughout the DEPI training program.

Technologies: Flutter, Firebase Firestore, Firebase Auth, Analytics, Crashlytics

E-commerce Application

- Engineered a prototype e-commerce app with Firebase Authentication and REST API integration.
- Applied Bloc/Cubit state management to deliver a smooth, responsive shopping experience.

Technologies: Flutter, Firebase Auth, REST API, Bloc/Cubit

Chat Application

built a real-time messaging app using Firebase Authentication and Firestore for live data sync. (Flutter, Dart, Firebase Authentication, Firestore)

Todo Application

developed a task manager using Clean Architecture and the Bloc pattern with Hive for offline persistence. (Flutter, Bloc, Hive)

Weather Application

integrated external REST APIs to display live weather data with JSON parsing and error handling. (Dart, REST APIs)

Theater Booking System

seat booking system using Dart and 2D array data structures.

Tuko App

Flutter Japanese language-learning app with custom UI/UX design.

E-commerce Application

Description: Developed a Flutter e-commerce prototype featuring Firebase Authentication, REST API integration, and effective state management.

Technologies: Flutter, Firebase Auth, REST API

Chat Application

Description: Built a real-time chat application using Dart, integrated with Firebase for authentication and message storage.

Technologies: Flutter, Firebase, Dart

Todo Application

Description: Created a task management app in Flutter following Clean Architecture and Clean Code principles, utilizing Bloc for state management and Hive for local persistence.

Technologies: Flutter, Bloc, Hive, Clean Architecture

Weather Application

Description: Developed a weather application integrating with external APIs to fetch and display weather data, demonstrating API integration skills.

Technologies: C++, API Integration

Theater Booking System

Description: Implemented a system for booking theater seats using 2D arrays for seat availability tracking and user information storage, showcasing data structure concepts.

Technologies: Dart, Data Structures

Tuko App

Description: Designed an educational application to assist users in learning Japanese, demonstrating versatility in applying programming skills.

Technologies: C++

Training

Digital Egypt Pioneers Initiative (DEPI) — Mobile Development Training 2025 – 2026

National initiative by MCIT; trained in Flutter, Clean Architecture, Firebase, and performance optimization; developed teamwork and problem-solving skills.

National Telecommunication Institute (NTI) — Practical Training Program, Mobile Development 2025

Hands-on Flutter and Dart development with focus on UI/UX and efficient data handling.

Information Technology Institute (ITI) — Intensive Training Program, Mobile Development with Flutter 2024

Mastered Bloc/Cubit state management, REST API integration, and local storage with Hive and SharedPreferences.
